

AMMAR ADIL

New Delhi, India • +91 7703929529 • ammaradil2020@gmail.com • [linkedin.com/in/okayadil](https://www.linkedin.com/in/okayadil)

PROFILE SUMMARY

Computer Science graduate specializing in Artificial Intelligence, with hands-on experience building AI/ML applications, including an LLM-based document Q&A system using embeddings and semantic search. Skilled in Python-based data analysis and full-stack development, with a strong foundation in data structures, algorithms, and analytical problem-solving. Detail-oriented, quick to learn, and comfortable documenting technical logic and collaborating cross-functionally in fast-paced environments.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript/TypeScript, Java

AI/ML & Data Analysis: OpenAI API, Embeddings & Semantic Search, NumPy, Pandas, Matplotlib, Power BI

Web & Backend Frameworks: React.js, React Native, Node.js, Express.js, Flask, Django, FastAPI, Streamlit, REST APIs, Bootstrap, Tailwind CSS

Databases: MongoDB, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, Excel, MS Word, PowerPoint

Core Concepts: Data Structures & Algorithms, OOP, Computer Networking, Model-View-Controller (MVC)

EDUCATION

B.Tech in Computer Science and Engineering — Specialization in Artificial Intelligence Aug 2021 – Aug 2025

Jamia Hamdard University, New Delhi

Higher Secondary & Intermediate (CBSE), Bethel Mission School, Kishanganj, Bihar 2017 – 2020

WORK EXPERIENCE

Backend Developer Intern | *Sazin Tech Pvt Ltd* Jan 2026 – Mar 2026

- Built a full-stack business management web application using Node.js, Express.js, and MongoDB to digitize measurement and cost-tracking workflows.
- Designed a RESTful API with a client-entry system to store and retrieve measurement records (length, width, perimeter, area, cost) linked to clients via mobile number.
- Implemented find-or-create client logic to automatically recognize returning clients and prevent duplicate records in the database.
- Developed and validated APIs to save, fetch, filter, and delete entries, with full input validation, error handling, and NaN prevention to ensure data integrity.
- Built a responsive frontend with real-time calculation of perimeter, area, and cost (CSS clamp() for fluid, cross-device layouts), and deployed the full app on a single Express server.

Full-Stack Engineer Intern | *Andi Software Solutions* May 2025 – Jul 2025

- Collaborated with a team of developers to design and evaluate solutions for complex technical problems.
- Developed responsive UI components using React.js, improving usability and application performance.
- Enhanced security and access control by helping design and manage user and role-based permissions.

PROJECTS

Chat with PDF — AI Document Q&A System | *Python, OpenAI API, Embeddings, Semantic Search*

- Built an AI-powered question-answering system that lets users query large documents in natural language, using embeddings and semantic search to retrieve relevant context before generating responses — a retrieval-augmented approach to grounding LLM outputs.
- Applied semantic similarity techniques to improve retrieval accuracy and reduce irrelevant or hallucinated responses, enabling efficient information extraction from unstructured text.

Lola — Voice Assistant | *JavaScript, Speech Recognition, Text-to-Speech*

- Engineered a custom voice assistant to automate everyday tasks via voice commands, integrating speech recognition and text-to-speech.
- Implemented task handling for opening apps, telling time, reading news, and web browsing.

CERTIFICATIONS

- Full-Stack Development — Chai Code

ACHIEVEMENTS & INVOLVEMENT

- Solved 100+ problems across coding platforms, including LeetCode, HackerRank, and Codeforces.
- Volunteer, GDSC Web Dev and College Fest — supported event logistics and website updates.
