

Ammar Adil

New Delhi • +91 7703929529 • ammaradil2020@gmail.com • <https://www.linkedin.com/in/okayadil>

A Computer Science graduate with a specialization in Artificial Intelligence from Jamia Hamdard. Experienced in full-stack web development, backend architecture, and AI-powered projects. Skilled at building scalable web applications and Strong analytical thinking, attention to detail, and the ability to break down complex challenges into simple, working solutions. Comfortable learning fast, adapting to new environments, and getting things done.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript/TypeScript, Python
- **Web & Backend:** HTML, CSS, REST APIs, React.js, React-Native, Node.js, Express.js, Bootstrap, Tailwind CSS
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools & Others:** VS Code, Git, GitHub, Streamlit, NumPy, Pandas, Matplotlib, Postman, Docker, Excel, MS Word, PowerPoint
- **Concepts:** Data Structures & Algorithms, Computer Networking, OOPS, Model-View-Controller (MVC), SDLC

EDUCATION

B.Tech in Computer Science and Engineering

- Specialization: Artificial Intelligence
- Jamia Hamdard University, New Delhi | Aug 2021 – Aug 2025

Intermediate (CBSE)

- Bethel Mission School, Kishanganj, Bihar | Apr 2019 – Mar 2020

Higher Secondary School Certificate (CBSE)

- Bethel Mission School, Kishanganj, Bihar | Apr 2017 – Mar 2018

WORK EXPERIENCE

Backend Developer Intern | SAZIN TECH Pvt Ltd | Jan 2026 – Mar 2026

- Built a full-stack business management web application using Node.js, Express.js, and MongoDB
- Designed and implemented a RESTful API with a Client-Entry system — enabling the company to store measurement records (length, width, perimeter, area, cost) linked to individual clients via mobile number.
- Implemented a find-or-create client logic so returning clients are automatically recognised by mobile number, preventing duplicate records in the database.
- Developed APIs to save, fetch, filter by client mobile, and delete entries — all with full validation, error handling, and NaN prevention.
- Built a responsive frontend (HTML, CSS, JS) with real-time calculation of perimeter, area, and cost — adapting fluidly across desktop and mobile screens using CSS clamp() for fluid typography.
- Deployed the full application on a single Express server serving both the API and the static frontend

Full-Stack Engineer Intern | Andi Software Solutions | May 2025 - July 2025

- Collaborated with other developers in designing solutions for complex problems.
- Developed responsive UI components using React.js, improving usability and performance.
- Enhanced security and access control by collaborating with the team to manage user and role permissions.

PROJECTS

Chat with PDF

- Developed an AI-powered document question-answering system using Python, OpenAI API, embeddings, and semantic search.
- Built with python, OpenAI API for semantic context understanding.
- Enables users to chat with large documents for efficient information extraction.

Lola – Voice Assistant

- Engineered A custom voice assistant built using JavaScript for automating everyday tasks via voice commands.
- Integrated speech recognition, text-to-speech (TTS).
- Handles tasks like opening apps, telling time, reading news, and web browsing.

CERTIFICATIONS

Full-Stack Development - Chai Code

ACHIEVEMENT

- Solved 100+ problems across various coding platforms (e.g., LeetCode, HackerRank, Codeforces)
- Volunteer, GDSC Web Dev, and College Fest (supported event logistics and website updates)
